Authorization for this examiner's amendment was given in a telephone interview with Matthew Zigmant on 12/08/05.

The application has been amended as follows:

Claim 8, line 2, "a sequence remains" has been replaced by --the sequences remain--.

2. The following is an examiner's statement of reasons for allowance: a method and apparatus are disclosed. The closest prior art, Armstrong, US Patent No. 5,432,429, discloses a similar method and apparatus. However, in combination with the other claimed limitations, Armstrong fails to anticipate or render obvious applicant's claimed limitations of "a serial interface operable to detect sequences of pulses on a port, interpret the sequences of pulses according to a serial protocol to determine corresponding battery management unit commands and provide the corresponding battery management unit commands to a controller", as recited in claim 10, and claim 22 and the limitations, recited in claim 17, lines 7-9, and claim 25, lines 8-13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
